### Description/Responsibilities

Our Highway Engineering Practice is looking for a **motivated, highly talented Highway Engineer** to join our **Columbus, OH** office. Successful candidate will have demonstrated professional experience in roadway design tasks. In this role you will have the opportunity to work with an experienced team of project managers and engineers responsible for providing roadway related design for a wide variety of public transportation projects, including roadway and intersection improvements, bridge replacements, drainage improvements, intelligent transportation systems, and highways and interchanges.

- Lead engineering design tasks for roadway projects from preliminary to final design on both traditional design/bid/build and design/build contracts
- Develop specifications, cost estimates, and prepare final bid packages
- Prepare plans required for construction of projects
- Prepare reports required by the project development process
- Complete tasks with multi-disciplined teams
- Perform checks/reviews following Gannett Fleming's ISO 9001:2008 Certified Quality Management System

### Qualifications

- Bachelor's Degree in Civil Engineering is required
- Licensed Professional Engineer in the State of Ohio or the ability to become registered in 6-12 months
- Minimum 4 years of related highway design experience
- Strong technical design background in at least one of the following areas: highway design, maintenance of traffic plan preparation, traffic control, and ITS engineering
- Familiarity with AASHTO and OMUTCD standards
- Prior design experience with Ohio Department of Transportation projects
- Hands on experience using CADD/Design Software (MicroStation and GeoPak) required
- Proficiency of Open Roads and AutoCAD a plus

- Strong written and oral communication skills
