

Transportation Planner/Engineer

Southwestern Pennsylvania Corporation (SPC) seeks a Transportation Planner/Engineer to assist with the development, implementation and administration of programs within the Transportation Planning Department. Position reports to the Manager of Transportation Operations and Safety.

Responsibilities:

- Assist with the development, implementation, and administration of work plans for various transportation operations and safety initiatives
- Major responsibility for updating, maintaining, and managing data associated with the Congestion Management Process (CMP). The CMP is a broad, regional level planning tool designed to help manage congestion by identifying congested corridors and recommending multimodal strategies for congestion mitigation. The goal of the CMP is to provide information that helps transportation planners, professionals and others to understand the overall congestion climate in individual corridors and the region
- Assist with the studies developed by the Regional Traffic Signal Program
- Assist in the development of the Regional Operations Plan
- Participate in Regional Road Safety Audits
- Maintain and update files and databases on various program activities
- Review and edit select reports and memorandums
- Plan, prepare for and staff both technical and specialty meetings

Qualifications:

- Requires Bachelor's degree in Planning, Civil Engineering, or other closely related field
- 1-3 years of experience in traffic engineering or transportation planning preferred
- Must have exceptional communication, organization, analytical and database/computer skills
- Demonstrated ability to work on multiple projects and work with federal, state and local officials on a regular basis

To Apply:

- Email letter of interest and resume to: hr@spcregion.org
- EEO/AA/M/F/Vet/Disability Employer
- SPC provides competitive compensation, including an excellent benefits package, flex time, mileage reimbursement, holiday/vacation pay and more
